Pull this through the bellow carefully. \$117.30 In Stock Order within the next 24 mins and your part ships today! Water Inlet Valve PartSelect #: PS11744913 Manufacturer #: WP8181694 Used with some front load washers. Orient is as it was when you took it off. You may need to feel with your hand but you should be able to see it. With the nut at the top or top right with the nut facing down to the floor while holding it vertically, squish it slightly inward, put the bottom portion in first then the top portion. I started at the top and worked left so I could install the detergent inlet tube. Sort by: Most Helpful Most Recent Search filter: Clear Filter Your search term must have 3 or more characters. (they come off much easier than they go back on).(8) I tested the pump and found it would run but was making a lot of noise and running slow. This hose clamp goes around the entire bellow and the secures it to the portion that holds the basket. This is where the stubby screw driver comes in handy. This is great because as you press it on, there is a positive stop and you can't go further than necessary. Start at any point and pull the rubber bellow in toward the opening of the washer, it comes off easily. When you get to the detergent outlet on the upper left side, grab the plastic tube and carefully pull the bellow from around it. Push it down toward the floor between the basket and the metal front panel. You will now be able to remove it from the top of the opening and be able to pull the bottom portion out. Pull the old bellow completely out, very easy to do. Time to install the new bellow. Parts Used: A Bit Difficult Less than 15 mins Nutdriver, Screw drivers 186 of 215 people found this instruction helpful. You will need to remove the hose clamp from the washer. The part number is 8182247 but unfortunately, the part is discontinued and there are no replacements. It doesn't take a lot of force. Now it is time to pull the remaining part of the bellow out of the basket and fit it into place. Slide it around the bellow. The nut will be pointing down and will need to be replaced the same way. Loosen the hose clamp almost all of the way, not necessary to have the hose clamp come completely apart. We are looking forward to hearing from you! I am looking for the bearing only. We hope this helps, good luck with this repair! Common Symptoms of the 11045087400 [Viewing 17 of 17] Videos related to models starting with 11045087400 [Viewing 8 of 17] Installation Instructions of parts on the 11045087400 [Viewing 3 of 213] Bellows were moldy, needed to replace The first step is to remove the retainer ring that holds the outside of the bellow in place. To do this, Open the washer door as far as you can to get it out of the way. \$7.54 In Stock Order within the next 24 mins and your part ships today! Touch-Up Paint - White PartSelect #: PS385132 Manufacturer #: 72017 This touch-up paint can be used on a wide variety of household appliances. To do this, squeeze it in from the sides about 6", don't kink it. remove the three screws from the top backside of the top panel 2. Please check back later if you still haven't found the answer you need. This will be at the very top. There is not nearly enough room for a standard one and a nut driver or wrench are too big. You can now remove the entire hose clamp from around the bellow by pulling it forward. Please submit a new question if you have any follow ups. I hope this helps. Grab the stubby screwdriver and tighten down the hose clamp. Continue to press it in all of the way around. Now it is time to install the Hose clamp. look underneath of the front of the bellow on the outside of the washer where it meets the door. It is most often used on washers, dryer, refrigerators, dishwashers, ranges, freezers, trash compactors, or microwaves. Does not include the plastic washer. (this is a front load washer), push the top panel to the rear 1/8 to 1/4 inch. I did about a medium force when tightening. Thank you for voting! front load washer latch replacement 1. Figure out which side goes in and which faces out. (9) To reinstall start with number (7) and work backwards to number (1) skipping (3) and (4). Don Kramer Wichita, Kansas Parts Used: A Bit Difficult 1-2 hours Pliers, Socket set 223 of 229 people found this instruction helpful. Once you have grip on it, pull it carefully toward you then up and off of the bellow. The front portion of the bellow is now free and can be peeled off. In order to verify a part number for your appliance, we will need to know what part you need. \$8.44 In Stock Order within the next 24 mins and your part ships today! Questions And Answers for 11045087400 We're sorry, but our Q&A experts are temporarily unavailable. It is... Switch to Classic Models > 11045087400 Sections of the 11045087400 [Viewing 7 of 7] Manuals & Care Guides for 11045087400 Click to download Owner's Manuals (8.84MB) Washer Baffle PartSelect #: PS11744968 Manufacturer #: WP8182233 This part moves the clothes around inside your dryer/washer and helps to direct the flow of hot air during the drying cycle. Use keywords, e.g. "leaking", "pump", "broken" or "fit". Keep searches simple. \$57.84 In Stock Order within the next 24 mins and your part ships today! Drain Pump Kit PartSelect #: PS1485610 Manufacturer #: 280187 This pump helps expel water from the washing machine and is activated after the spin speed is maintained for a specific period of time. It doesn't take a lot of force. As you are pressing the bellow on this lip, you will notice that there is a 1/2" high back stop all of the way around. The Bearing and Seal are not available separately from the Drum Assembly. Remove the rest of the front portion of the bellow. Push as much of the bellow into the washer as possible to get it out of the way. Once this is off comes the slightly tricky part. Is there a product number/model/serial that looks like the above for 11045087400 For model number 11045087400 Hello Richard, Thank you for the question. The big hint is that the water inlet is on the upper left side. You will notice at the top of the bellow on the portion that goes inside of the washer, you will find a small triangular shaped tab about 1/4" high. You will find a spring stretched about 3" connected to a small diameter wire (1mm.) that runs all the way around the outside portion of the bellow. Use a small screwdriver or other to pull and pry the spring away from the rubber bellow. 79640518900, 79641022900, 79641028900, 79641029900, 79642192900, 79642198900, 79642199900. I am seeing model numbers that look like the above. This w Parts Used: Franck from Annandale, VA 15 - 30 mins 351 of 373 people found this instruction helpful. There is no adhesive or clamp holding this in place, just friction. You will feel a positive stop. Be careful not to damage the spring or ring. \$168.16 On Order Door Lock Latch PartSelect #: PS11745016 Manufacturer #: WP8182634 This part is used on front load washers and includes the interlock switch assembly. \$73.25 In Stock Order within the next 24 mins and your part ships today! Shock Absorber PartSelect #: PS11745030 Manufacturer #: WP8182703 Shock absorbers help keep the washer from vigorous shaking during its cycles. If you keep this at the top, everything will line up perfectly. Slip the bellow over the edge of the portion that holds the basket where you removed the old one. The spider for your unit is part of the basket only. Sold individually. This is your centering mark. I see you sell the whole drum but not just the bearing. Thank you for voting! Washer would not drain, F02 and SUD code displaying (1) First I unplugged the washer then I removed the water from the tube with a water vac. (2) Then I removed the three (3) screws that holds the front panel, using a Torx T-20 socket. The attaching solenoids on the valve open and close according to the desired temperature, or amount of water needed. Look up at the top right portion of the bellow that is still attached. Press it around the outside portion of the opening so it hooks over the lip. Thank you for voting! 3 questions answered by our experts. lift/rotate top panel from rear to front, set aside. 4. remove the three wire connectors from latch. 5. use #15 Torx to remove the three screws from the latch. 6. remove and replace part using top opening. 7. reverse order to finish. Can you provide the correct part number for the 110.45087.400 model For model number 11045087400 Hello Richard, Thank you for the question. Un bent anything that might have bent on the clamp. You are looking for the screw/nut end of a giant hose clamp. Sorry, we couldn't find any existing answers that matched. Try using some different or simpler keywords, or submit your new question by using the "Ask a Question" button above! Which spider do i need For model number 11045087400 Hello Monica, thank you for your question. This part is used on front load models. (3) I packed towels under the washer. (4) I slowly removed the cleanout in the front of the pump, using the water vac to catch the water as it leaked out. (5) I removed the wiring to the motor. (6) I removed the screw that holds the pump in place with a Torx T-20 socket. (7) I pulled the pump forward so the clamps that hold the drain hose and discharge hose could be removed using the hose clamp pliers. \$53.24 In Stock Order within the next 24 mins and your part ships today!
